StaySpotter: Routers

Search Router:

- Path: /search?q=...
  - **GET:** Perform a search and return matching listings.

Home Router:
- Path: '/'
  - **GET:** returns the data needed for the HomePage.

Listings Router:
- Path: '/listings
  - **GET:** returns the data needed for the ListingsPage.
- Path: 'listings/:id'
  - **GET:** Returns the rental listing with the specified ID. This could be used in the RentalDetailPage.

Contact Router:
- Path: '/contact'
  - **GET:** returns the data needed for the ContactPage.
  - **POST:** Receives form data in the request body and saves the data to the server.

Additional Routers (if time allows):

Users Router:
- Path: /users/:id
  - **GET:** Returns the user with the specified ID.
  - **PUT:** Updates the user with the specified ID.
  - **DELETE**: Deletes the user with the specified ID.
- Path: /users
  - **POST:** Creates a new user.

Authentication Router:
- Path: /auth/login
  - **POST:** Logs in a user.
- Path: /auth/logout
  - **POST:** Logs out a user.
- Path: /auth/signup
  - **POST:** register a new user.
